RAMYA K

(Java Full Stack Developer)

Sathanandhal/ 7603928428 / ramyakaruna00@gmail.com LinkedIn: www.linkedin.com/in/ramya-k-b64b53225

PROFILE SUMMARY

Full Stack Developer skilled in **HTML, CSS, JavaScript, Bootstrap, React, and Java**, with backend knowledge of **Java and MySQL**. Experienced in building responsive, multi-page web applications, including an Endangered Animals awareness website using pure HTML and CSS. Strong in writing clean, maintainable code and core programming concepts.

TECHNICAL SKILLS

• Frontend: HTML, CSS, Bootstrap, React, JavaScript.
• Backend: Java, MySQL
• Tools: VS Code, GitHub

PROJECTS

E-commerce Website – Front-End

I created a simple yet functional replica of Flipkart's e-commerce website using HTML5 and CSS3. This project helped me understand the fundamentals of front-end development, with a focus on layout, responsiveness, and user interface design. The website features key elements, including product listings, a functional search bar, and intuitive navigation menus. I ensured the design was responsive, making it accessible and visually appealing across various devices, from desktops to smartphones. The project not only improved my coding skills but also gave me insights into how e-commerce platforms are structured and function.

Supercar Website– Front-End:

I'm creating a supercar website using HTML, CSS, and Bootstrap. The goal is to showcase high-end cars with a sleek design. I'll need basic HTML knowledge, CSS for styling, and Bootstrap for responsiveness. The website will have a home page with a hero banner, a car models section, car details pages, and a gallery. I'll set up the HTML structure with a link to Bootstrap and a custom CSS file. The hero banner will have a background image, a heading, and a call-to-action

---

INTERNSHIPS

• One-month internship on Full Stack Web Development at 8Queens Software Company.

CERTIFICATION

Completed Java Full Stack Web Development course at Code99 Academy, Velachery.

Completed covering HTML and Java in linkedIn
